## *Quarterly News Paper*

### *Greetings to you!*

By the end of October 2003, the first phase of the Park Maitland School expansion project should be completed. This phase includes a permanent turnaround on Tangerine Place with a decorative wall and landscaping. These improvements will be a welcome replacement of the current blockades at that location.

The City is currently working with Progress Energy (formerly Florida Power) on the undergrounding of the electric and utilities. Progress Energy will be

sending the easements to the City the first week of August. The City will review them and send them to the individual residents with both a cover letter from Progress Energy and the City of Maitland explaining to the resident what needs to be done to complete the easements. Once all the easements have been executed and returned to the City, the work can be scheduled. The City appreciates your continued participation.
